Dear Sirs,

Having tried to respond as an interested local stakeholder and having found that clicking on your link <https://consultation.caa.co.uk/policy> development does not work, I wholeheartedly agree with CAGNE that local residents, who understand the negative effect on the local infrastructure, are not being treated as equal stakeholders with those of the aviation industry.

Besides, any increase in aircraft use must be restricted, alongside measures in other CO2 emitting sources, if Climate Change is not to get even worse than it already is.

Yours faithfully, John Graham Taylor
